Measure description

Coding

Prenatal and Postpartum Care (PPC)

The percentage of deliveries of live births on or between October 8 of the year prior to the MY and October 7 of the MY. For these women, the measure assesses the following facets of prenatal and postpartum care.

- Timeliness of Prenatal Care.
 The percentage of deliveries that received a prenatal care visit in the first trimester, on or before the enrollment start date or within 42 days of enrollment in the organization.
- Postpartum Care.
 The percentage of deliveries that had a postpartum visit on or between seven and 84 days after delivery.

Prenatal care visit to an OB/GYN or other prenatal care practitioner or PCP. For visits to a PCP, a diagnosis of pregnancy must be present. Documentation in the medical record must include a note indicating the date when the prenatal care visit occurred, and evidence of **one** of the following:

- Documentation indicating pregnancy or reference to pregnancy (use of a standardized prenatal flow sheet, documentation of last menstrual period [LMP], estimated due date [EDD], gestational age [GA], a positive pregnancy test, gravidity and parity, a complete obstetrical history, prenatal risk assessment or counseling/ education).
- A basic physical obstetrical examination that includes auscultation for fetal heart tone, or pelvic exam with obstetric observations, or measurement of fundus height.
- Evidence that a prenatal care procedure was performed (e.g., OB panel, ultrasound).

Postpartum visit to an OB/GYN or other prenatal care practitioner or PCP. Documentation in the medical record must include a note indicating the date when the postpartum care visit occurred, and evidence of one of the following:

- Pelvic exam: colposcopy is not acceptable for a postpartum visit.
- Evaluation of weight, blood pressure (BP), breasts, and abdomen: Notation of "breastfeeding" is acceptable for the "evaluation of breasts" component.
- Notation of postpartum care, including, but not limited to: notation of "postpartum care," "PP care," "PP checks," "six-week check."
- A preprinted postpartum care form in which information was documented during the visit.
- Perineal or cesarean incision/wound check.
- Screening for depression, anxiety, tobacco use, substance use disorder, or preexisting mental health disorders.
- Glucose screening for women with gestational diabetes.
- Documentation of any of the following: infant care or breastfeeding; resumption of intercourse, birth spacing, family planning; sleep/fatigue; resumption of physical activity; attainment of healthy weight.

Note:

- Services provided during a telephone visit, e-visit, or virtual check-in are acceptable.
- Services that occur over multiple visits count toward Timeliness of Prenatal Care if all services are within the time frame established in the measure. Ultrasound and lab results alone are not considered a visit; they must be combined with an office visit with an appropriate practitioner in order to count for this measure.

Measure description **Documentation required**

Statin Therapy for Patients with Cardiovascular Disease (SPC)

Males 21 - 75 years of age and females 40 – 75 years of age during the MY, who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and met the following criteria.

Two rates are reported:

2. Statin adherence 80%:

Members who remained on a highor moderate-intensity statin medication for at least 80% of the treatment period (TP).

The Index Prescription Start Date (IPSD) is the earliest dispensing date for any statin medication of

at least moderate intensity during the MY. The TP is the period beginning on the IPSD through December 31 of the MY.

Required exclusions:

Members who meet any of the following criteria are excluded from the measure:

- Myalgia, myositis, myopathy, or rhabdomyolysis during the MY.
- Pregnancy, in vitro fertilization (IVF) treatment, clomiphene Rx, cirrhosis, end-stage renal disease in the MY or the year prior to the MY.

Optional exclusions:

Noncompliant members may be excluded from the measure with documentation of any of the following:

Measure/coding tips

Cardiac Rehabilitation (CRE)

First Year Measure (MY2020)

Measure description

The percentage of members age 18 and older who attended cardiac rehabilitation following a qualifying cardiac event, including:

- · Myocardial infarction.
- Percutaneous coronary intervention.
- Coronary artery bypass grafting.
- Heart and heart/lung transplantation.
- Heart valve replacement.

Four rates are reported as the percentage of members who attended the specified number of cardiac rehabilitation sessions within the specified time after a qualifying event:

- **1. Initiation:** Two or more sessions within 30 days.
- 2. Engagement 1:

12 or more sessions within 90 days.

3. Engagement 2: 24 or more sessions within 180 days.

4. Achievement:

36 or more sessions within 180 days.

Documentation required

The MY is January 1 - December 31.

The IP is a 12-month window that begins on July 1 of the year prior to the MY and ends on June 30 of the MY.

The episode date (ED) is the most recent cardiac event during the IP, including myocardial infarction (MI), coronary artery bypass graft (CABG), percutaneous coronary intervention (PCI), heart or heart/lung transplant, or heart valve repair/replacement.

For MI, CABG, heart or heart/lung transplant, or heart valve repair/replacement, the ED is the date of discharge.

For PCI, the ED is the date of service. For inpatient claims, the ED is the date of discharge.

Required exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Receiving palliative care during the IP through the end of the MY.
- 66 years of age and older with frailty and advanced illness during the MY.
- 81 years of age and older with frailty during the IP through the end of the MY.
- Discharged from an inpatient setting with the following during the 180 days after the EP: MI, CABG, heart or heart/lung transplant, heart value repair or replacement.
- PCI in any setting during the 180 days after the EP.

Optional exclusions:

Noncompliant members may be excluded from the measure with documentation of any of the following:

· Deceased in the MY.

Comprehensive diabetes care (CDC) eye exam

Members 18–75 years of age with diabetes (type 1 and type 2) who had a retinal eye exam during the measurement year (MY), or an exam with a negative result in the year prior to the MY or documentation of bilateral eye enucleation any time prior to 12/31 of the MY.

 A note or letter during the MY prepared by an ophthalmologist, optometrist, PCP, or other health care provider indicating that an ophthalmoscopic exam was completed by an eye care provider, the date when the procedure

Documentation can include any of the following

- Documentation of a negative (or normal) retinal or dilated exam by an eye care provider in the year prior to the MY, where results indicate retinopathy was not present and the date when the exam was performed.
- A chart or photograph indicating the date when the fundus photography was performed and evidence that an eye care professional (optometrist or ophthalmologist) or qualified reading center reviewed the results, or that results were read by a system that provides artificial intelligence (AI) interpretation.

Hypertensive retinopathy is handled the same as diabetic retinopathy when reporting the Eye Exam indicator.

Positive for hypertensive retinopathy is counted as positive for diabetic retinopathy.

An eye exam documented as negative for hypertensive retinopathy is counted as negative for diabetic retinopathy.

Common abbreviations for Retinopathy:

- · NPDR Non-Proliferative Diabetic Retinopathy
- PDR Proliferative Diabetic Retinopathy
- BDR Background Diabetic Retinopathy
- Mild BDR
- Severe PDR

Examples of Negative Exam:

Assessment of fundus and macula were "normal."

Diabetes Mellitus without Ophthalmic complication.

Retinal exam documented as "normal" is considered negative for Retinopathy.

Note: Notation limited to a statement that included "Diabetes without complications" does not meet criteria.

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Receiving palliative care any time in the MY.
- 66 years of age and older with frailty **and** advanced illness during the MY.

Optional Exclusions:

Non-compliant members may be excluded from the measure with documentation of any of the following:

- No diagnosis of Diabetes in any setting during the MY or the year prior and who had a diagnosis of polycystic ovarian syndrome, gestational diabetes or steroid-induced diabetes during the MY or the year prior.
- Deceased in the MY.

Blindness is not an exclusion for a diabetic eye exam.

Do not include BP readings taken on the same day as a diagnostic test or diagnostic or therapeutic procedure that requires a change in diet or change in medication on or one day before the test or procedure, with the exception of fasting blood tests.
